

Halogen Moisture Analyzer

Halogen moisture analyzer for mass-loss measurements during drying. Select sample mass, heating temperature and endpoint mode for the material.

Technical Information

Maximum sample mass	50 g
Readability	1 mg
Repeatability	0.2%; 3 g sample
Minimum sample mass	0.5 g
Recommended sample mass	3-50 g
Heating temperature	50-180 °C
Heating time	1-99 min; 1 min increments
Heating program	standard
Endpoint modes	timed / automatic
Communication	RS232
Pan diameter	100 mm
Dimensions	265 × 160 × 150 mm
Net weight	5 kg
Gross weight	6 kg

Technical Information

Heat source

halogen lamp

Standard Configuration

The quotation must identify the selected instrument configuration and supplied accessories. Where several specifications are listed, they describe separate versions in the same order; they do not describe one combined configuration.

Optional Configuration

Optional equipment and consumables are supplied only when itemized in the quotation. Confirm dimensions, compatibility, electrical supply and the required configuration before ordering.

Selection and ordering

Include the PRECETTA model, selected specification, sample or application, quantity and destination in your inquiry. Use the complete PDF to compare variants and configuration details.

Technical Information

The analyzer displays moisture, solids, mass, time and date, with timed or automatic endpoint control. RS232 connects external equipment; a printer or computer is not stated as included.
