

Water Bath Nitrogen Evaporator

Concentrates samples with individually adjustable nitrogen streams and water-bath heating. Select the number of positions and tube diameter.

Technical Information

Positions	12 / 24 / 36 / 48
Temperature range	ambient-100 °C
Temperature accuracy	±1 °C
Gas flow	0-15 L/min
Nitrogen consumption	330 mL/min/sample
Dimensions	535 × 390 × 620 mm
Standard tube diameter	15 mm
Control	PID; digital display; overtemperature alarm
Standard rack quantity	1

Standard Configuration

The quotation must identify the selected instrument configuration and supplied accessories. Where several specifications are listed, they describe separate versions in the same order; they do not describe one combined configuration.

Optional Configuration

Optional equipment and consumables are supplied only when itemized in the quotation. Confirm dimensions, compatibility, electrical supply and the required configuration before ordering.

Selection and ordering

Include the PRECETTA model, selected specification, sample or application, quantity and destination in your inquiry. Use the complete PDF to compare variants and configuration details.

Technical Information

One tube rack is specified as standard. The standard tube opening is 15 mm; special diameters and rack forms require prior arrangement. Nitrogen supply is not specified as included. Gas channels can be adjusted and switched individually.
