

Stainless Steel Water Distiller Series

Stainless steel water distillers with ≥ 5 L/h or ≥ 10 L/h output. Select the corresponding electrical supply and heating power.

Technical Information

Output	≥ 5 / ≥ 10 L/h
Electrical supply	220 V AC, 50 Hz / 380 V three-phase AC, 50 Hz
Heating power	4.5 / 7.5 kW
Packaging dimensions	350 × 340 × 780 / 420 × 380 × 900 mm
Construction	stainless steel
Condenser	coil
Heating element	copper immersion element

Standard Configuration

The quotation must identify the selected instrument configuration and supplied accessories. Where several specifications are listed, they describe separate versions in the same order; they do not describe one combined configuration.

Optional Configuration

Optional equipment and consumables are supplied only when itemized in the quotation. Confirm dimensions, compatibility, electrical supply and the required configuration before ordering.

Selection and ordering

Include the PRECETTA model, selected specification, sample or application, quantity and destination in your inquiry. Use the complete PDF to compare variants and configuration details.

Technical Information

The ≥ 5 L/h and ≥ 10 L/h versions require different electrical supplies. Cooling water returns to the evaporation vessel; a drain valve removes concentrated water. No certified water-purity grade is specified.
